

ONE 299

ONE299 HARNESS SYSTEM

OVERVIEW

The ONE299 Harness System consists of two shoulder straps, a waist belt and the Patented ONE299 Adjustable Frame. The system is the ultimate in adjustable harness system using all components within the system to meet the 1st to 99th percentile user. The harness integrates with most commercial off the shelf packs and will accommodate heavy loads. The harness assist in load bearing by redistributing unwanted weight from the shoulders to the hips.
